DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-9, drawn to a method and means of preventing software piracy, classified in class 705, and subclass 59.

Group II, claim 10, drawn to a method of enforcing the terms of a software license through copy prevention, classified in class 705, subclass 57.

Group III, claim 11, drawn to a method and means of creating a database, classified in class 707 and subclass 1.

4. Inventions I-III are disclosed as usable together in a single invention. The inventions are distinct from each another if they are shown to be separately usable. In this case, invention I has a separate utility such as means of software distribution and redistribution. Invention II has a separate utility such as controlling copying of software. Invention III has a separate utility such as creating a database. See MPEP sec. 805.05(d). Because these inventions are distinct for the reasons given above, restriction for examination purposes is proper.

Art Unit: 3621

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed. (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.17(i).
